

Installation

1. Go to <https://nodejs.org/en/download/> and download the relevant version of node.js.
2. Go to the [github](#) and download/clone the repository to your computer.
3. Opening terminal, enter the directory where the code is located (for example, /Documents/lg-peruse-a-rue-master) and run the command `npm install`.

```
5. node
kripak@uwu-central ~ % cd Documents/gci/lg-peruse-a-rue-master
kripak@uwu-central lg-peruse-a-rue-master % npm install
npm WARN deprecated connect@2.30.2: connect 2.x series is deprecated

> ws@0.4.32 install /Users/kripak/Documents/gci/lg-peruse-a-rue-master/node_modules/ws
> (node-gyp rebuild 2> builderror.log) || (exit 0)

npm notice created a lockfile as package-lock.json. You should commit this file.
npm WARN lg-peruse-a-rue@0.6.4 license should be a valid SPDX license expression

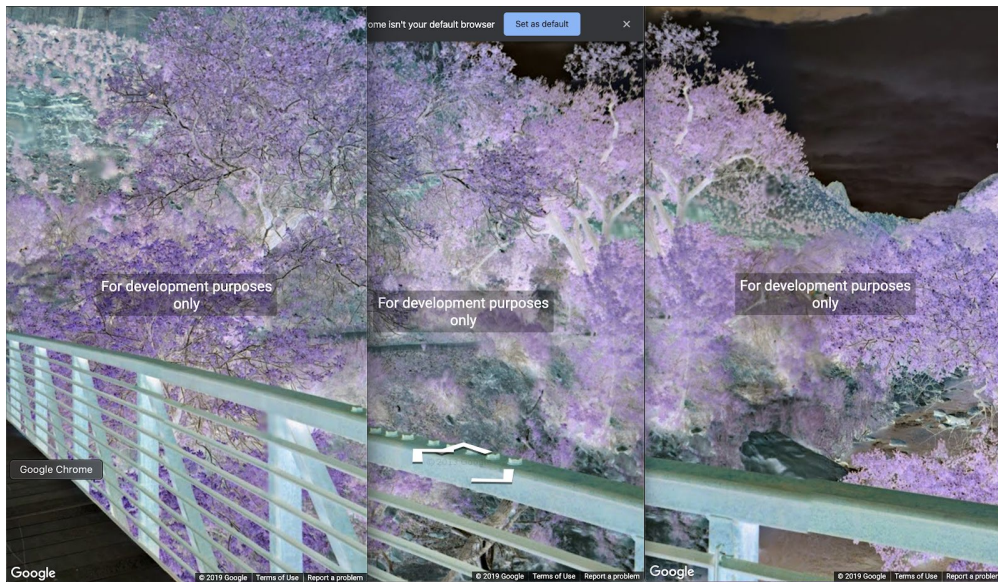

added 125 packages from 102 contributors and audited 222 packages in 6.623s
found 23 vulnerabilities (12 low, 3 moderate, 8 high)
  run `npm audit fix` to fix them, or `npm audit` for details
```

4. Run the command `npm install`. If you open <http://localhost:8086/display/?master=true> in your browser, you should get this image or a similar one.

5. By opening <http://localhost:8086/display/?yawoffset=-1> and <http://localhost:8086/display/?yawoffset=+1> you can simulate the left and right screens in Liquid

Galaxy, respectively.

Findings

Before Auditing

Peruse-a-Rue was run in Firefox 71.0 and Chrome 79.0.3945.79. Installation took 5 minutes, as I already had node installed. There were no problems during the installation.

```
5. node
kripak@uwu-central ~ % cd Documents/gci/lg-peruse-a-rue-master
kripak@uwu-central lg-peruse-a-rue-master % npm install
npm WARN deprecated connect@2.30.2: connect 2.x series is deprecated

> ws@0.4.32 install /Users/kripak/Documents/gci/lg-peruse-a-rue-master/node_modules/ws
> (node-gyp rebuild 2> builderror.log) || (exit 0)

npm notice created a lockfile as package-lock.json. You should commit this file.
npm WARN lg-peruse-a-rue@0.6.4 license should be a valid SPDX license expression

```

Denial of Service	crash when Sec-WebSocket-Extensions header containing Object.prototype property names as extension or parameter names is sent	upgrade ws to version >= 3.3.1
Regular Expression Denial of Service	malicious inputs can be passed	upgrade negotiator to version >= 0.6.1
Regular Expression Denial of Service	malicious inputs can be passed	upgrade fresh to version >= 0.5.2
Regular Expression Denial of Service	malicious inputs can be passed	upgrade debug to version >= 2.6.9 or 3.1.0
Regular Expression Denial of Service	malicious inputs can be passed	upgrade mime to version >= 2.0.3
Out-of-bounds Read	out-of-bounds read possible because uninitialized buffers allocated	upgrade base-64 to version >= 2.0.0
Code Injection	malicious inputs can be passed	upgrade morgan to version >= 1.9.1
Prototype Pollution	prototype of Object can be modified	upgrade extend to version >= 2.0.2 or 3.0.2

There was a slight delay between the windows, but that was likely to the network connection. I did, however see some offset between the windows.

Additionally, I tested the application in Firefox, Chrome, and Safari, all of which worked. The documentation states that it only works on Chromium, which is outdated.

After Auditing

Using `npm audit fix` was ineffective, so I had to use `npm audit fix --force`. However, this completely broke the app.

```
kripak@uwu-central lg-peruse-a-rue-master % node index.js
